TENAX SD

Type: 4-1
Geocomposite

TENAX **SD** geocomposites are a combination of TENAX geonet and one nonwoven geotextile. The combination of geotextile (filtering action) and geonet (drainage and protection) offers a complete system of "filter-drainage-protection".

Typical applications

Waste disposals; underground structures; retaining walls; gardens and sport fields; road foundations; ground channels.

PHYSICAL CHARACTERISTICS	TEST METHOD	UNIT	SD 4-1	NOTES

The TENAX Laboratory has been operational since 1980 and has been continuously improved with the purpose of assuring unequalled technical development of the products and accurate Quality Control.

The TENAX Laboratory can perform mechanical, hydraulic and durability tests, according to the most important international standards like ISO, TNN, ASTM, DIN, BSI, UNI.
